SAVIO

DINING TABLE

Born out of the wisdom of ancient archetypes, the Savio Collection is an exploration of timeless geometry through the lens of contemporary furniture and sculpture.

Research into arches and columns used across millennia, informed the core principles of the Savio tables and garden lights. Through the use of digital technologies, parabolic curves and advanced manufacturing at SNOG, Patryk created sleek and supple forms that defy convention in a durable sandstone like composite.

The unique textured finish of tables and lightings diffuses light giving the surface a sophisticated complexity. Savio Dining Tables are the definitive statement piece for outdoor living. Light and shadow softly transition as the tables change in appearance throughout the day exposing details in the geometry. At night Savio garden and table lights illuminate space through their stored solar energy.
